

## eIDAS-compliant remote signing with video-based identity verification backed by AI

**Fully digital, cost effective, and flexible solution for organisations that are going paperless and expect highest assurance in customer onboarding and digital document signing processes**

### **SIGNIUS – eIDAS Compliant Remote Signing**

Modern and state of the art Remote Signing Platform offered to individuals as well as business customers. The platform integrates seamlessly with various identity verification methods and document management systems. It supports various deployment models:

#### ✓ **SIGNIUS Professional**

A fully managed, simple, and convenient cloud service for users and organisations that want to sign documents with a Qualified or Advanced Electronic Signature instantly and in a legally binding way.

#### ✓ **SIGNIUS Enterprise**

A comprehensive platform for Digital Contract Management, Electronic Signing and KYC, CFT & AML compliant Remote Customer Identification - offered as a SaaS/ Cloud service or hybrid service or a full on-premise deployment.

### **Fully-Verified – Video-Based Digital Onboarding backed by AI**

Banking Grade - Identity Verifications, Online, on Video. Fully-Verified is an online identity verification service, which eliminates fraud, speeds up customer onboarding, and ensures compliance with regulations. Available in two options:

#### ✓ **Live-Verify**

End-user connects with a verification specialist on a live video call in order to verify their identity. This process satisfies the highest security and compliance regulations.

#### ✓ **Self-Verify**

End-user performs the identification procedure on their own by taking a selfie and pictures of their document. The whole procedure is recorded on video.

# Solution

The joint solution of SIGNIUS and Fully-Verified offers a unique and trusted digital service for companies and organisations who want to speed up their Customer Onboarding process, go paperless, improve cost-effectiveness, and streamline document processing while signing, managing and archiving documents in fully digital processes.

Designed for enterprises, large organizations, small and medium companies and individual users, the solution strengthens security while providing at the same time an unmatched experience in end to end processes. It combines extremely user friendly eIDAS-compliant remote signing platform SIGNIUS with KYC/AML-compliant, cost-effective and convenient video-based customer onboarding process from Fully-Verified - available on all devices.

## Process

Signing made as simple as possible!

Initial signing process includes **one-time** identity verification.

After initial identity verification signing can take **just a minute!**

- 1 Document**  
A user chooses one or more document(s) to sign and uploads it to the application.
- 2 Identity verification**  
A one-time, quick and secure onboarding process done in one of 2 methods to choose:
  - ✓ **Live-Verify** – live verifications, on a video-call with a trained specialist, backed by AI
  - ✓ **Self-Verify** – automated process recorded on a live video
- 3 Remote signature**  
The document is being automatically signed with an Electronic Signature.
- 4 Signed document**  
Signed document is ready for download and automatically sent to the provided e-mail address.

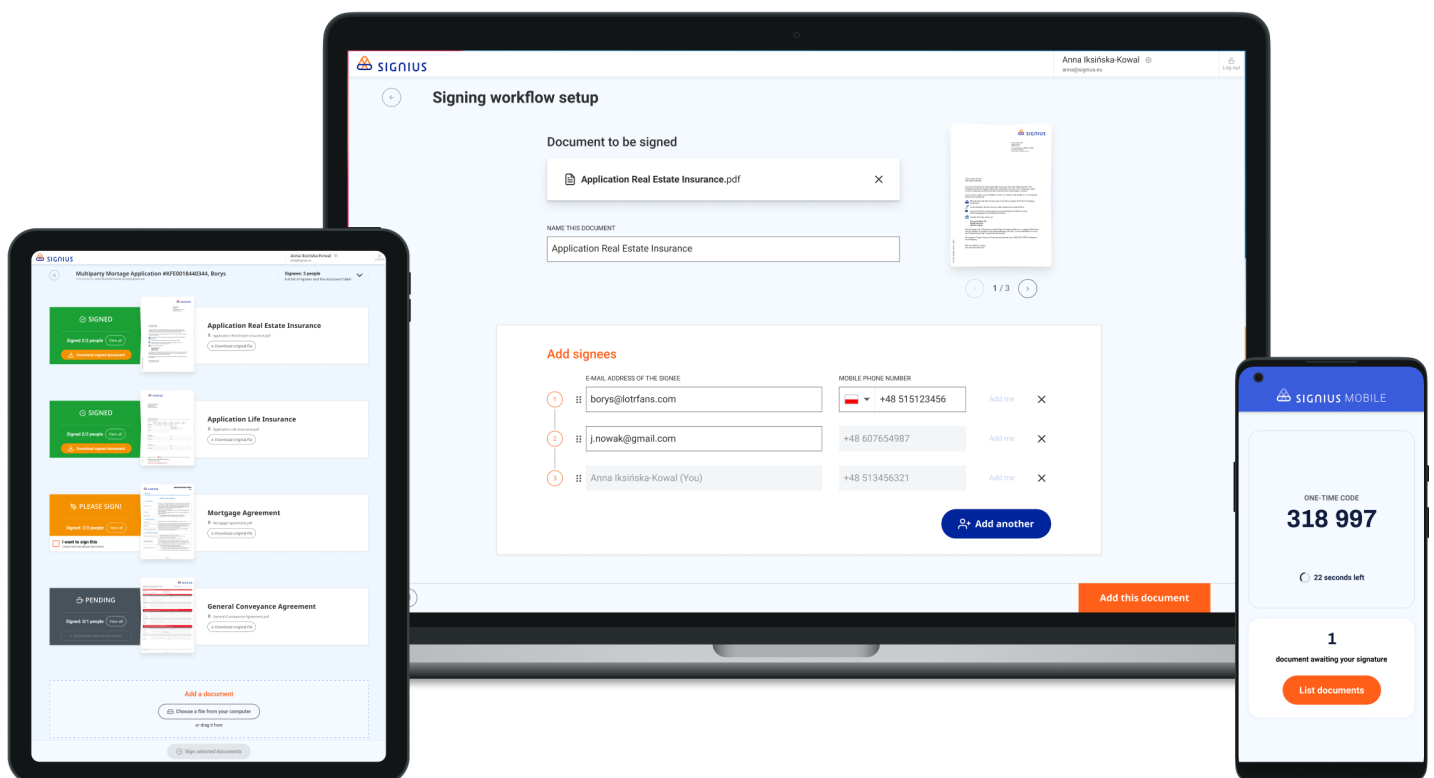

## Key Benefits

- ✓ **Fully digital customer journey with fast Customer Onboarding** - user signs documents after quick and safe identity verification in a single online process - anytime, anywhere
